**CONSENT TO TREATMENT**

Health care providers are required to advise patients of the nature of the treatment to be provided, the risks and benefits of the treatment, and any alternatives to the treatment.

There are some risks that may be associated with treatment, in particular you should note:

1. While rare, some patients have experienced rib fractures or muscle and ligament sprains or strains following treatment.
2. There have been rare reported cases of disc injuries following cervical and lumbar spinal adjustment although no scientific study has ever demonstrated such injuries are caused, or may be caused, be spinal or soft tissue manipulation or treatment.
3. There have been reported cases of injury to a vertebral artery following osseous spinal manipulation. Vertebral artery injuries have been known to cause a stroke, sometimes with serious neurological impairment, and may on rare occasion, result in paralysis or death. The possibility of such injuries resulting from cervical spine manipulation is extremely remote.

Osseous and soft tissue manipulation has been the subject of government reports and mulch-disciplinary studies conducted over many years and have demonstrated it to be highly effective treatment of spinal conditions including general pain and loss of mobility, headaches and other related symptoms. Musculoskeletal care contributes to your overall well being. The risk of injuries of complications from treatment is substantially lower than that associated with many medical or other treatments, medications, and procedures given for the same symptoms.

I acknowledge I have discussed the following with my healthcare provider:

1. The condition that the treatment is to address.
2. The nature of the treatment.
3. The risks and benefits of that treatment.
4. Any alternatives to that treatment.

I have had the opportunity to ask questions and receive answers regarding the treatment.

I consent to the treatment offered or recommended to me by the healthcare provider, including osseous and soft tissue manipulation. I intend this consent to apply to all my present and future care with \_\_\_\_\_ (*health care provider's name*).
